

Proposition 84

Statewide Park Program – Round One

City of King City

\$610,000

King Street Pocket Park

This project will create the new King Street Pocket Park to include acquisition of .19 acres and construction of a new playground, picnic area, and sports court in King City.

Through community based planning meetings, youth, seniors, and families selected these features. Additional design ideas from residents to be included in the project are:

- Include a play area with rock climbing, tree house, and slides; a separate swing set/slide area; a picnic area with tables and an overhead trellis cover; a multi-purpose sports court; and include trees and a walking path.
- Place play structure and swings at front of the site, and place picnic area near play structure so parents can see children. Place sports court near the back of the site to maintain visibility, and place trees, lighting and pathways throughout the park.
- Create a visually open park design. Locate trees along the perimeter, remove landscaping boulders, and add more lighting to increase visibility. Add a net near the sports court to capture stray balls.
- 30 local preschoolers will paint tiles to create a tile mosaic for the sound wall. 10 4-H club volunteers will plant trees.

The project will include these sustainable techniques:

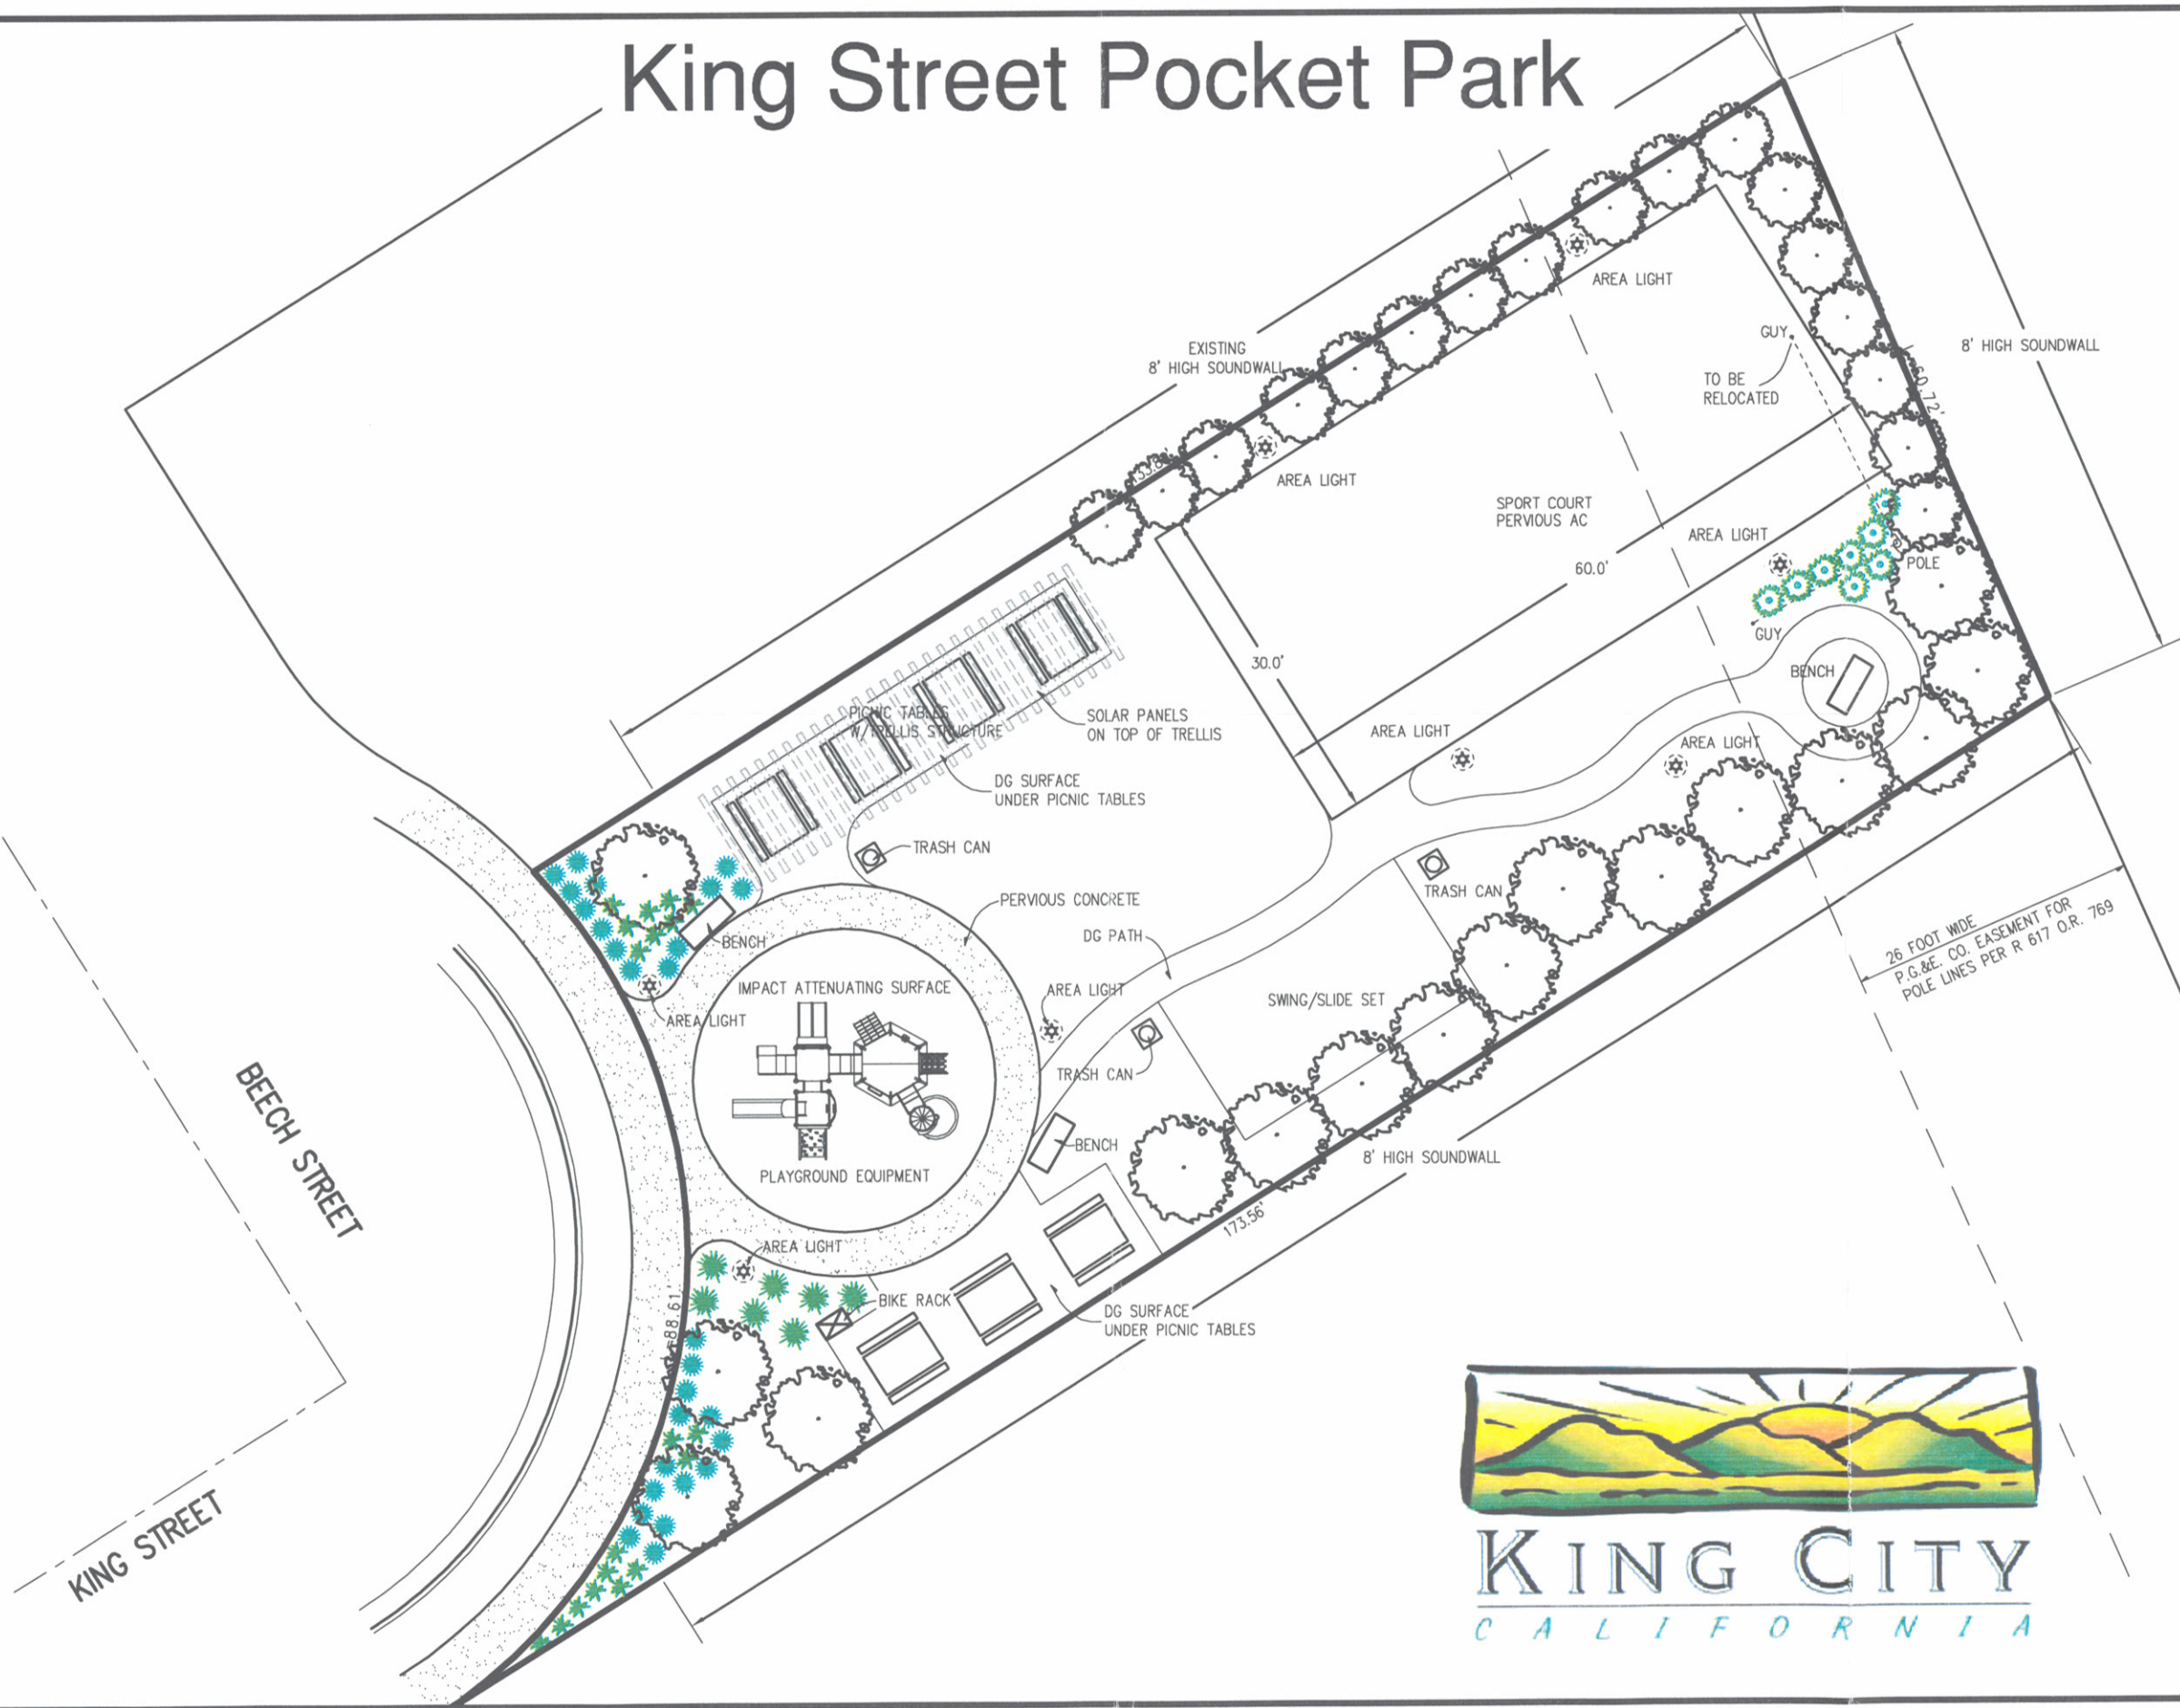

- Drip Irrigation system will include a rain sensor and soil moisture meter.
- Use pervious asphalt and concrete.
- At least 10% of the materials used for the site will be recycled materials.
- Use drought tolerant, non-invasive, native species.
- The project will include solar panels on top of trellis and decomposed granite.

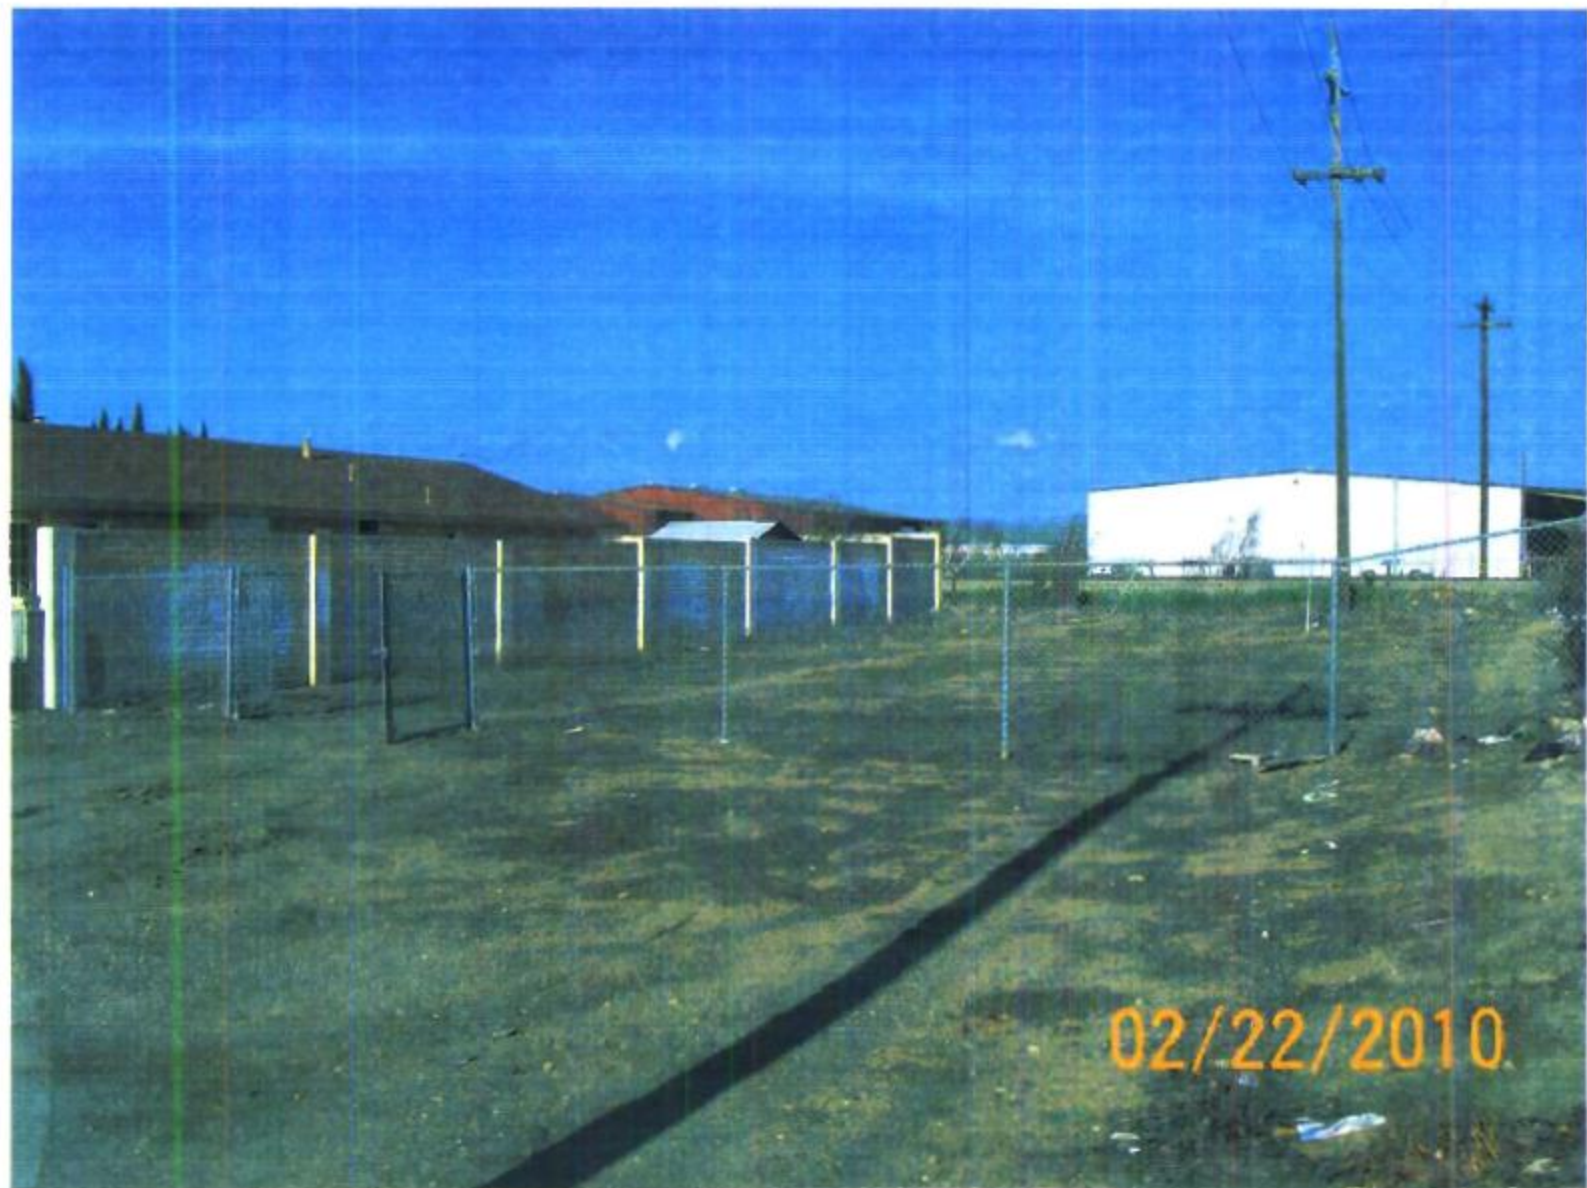

The park will be open daily from sunrise to sunset. No entrance or membership fees will be charged.
